## **Biography**

*Dr Amit Gupta DCH, MD, FRCPCH, PG Cert Clinical Education  
Neonatal Consultant, John Radcliffe Hospital, Oxford  
Associate Dean, Oxford Deanery (Thames Valley Health Education England)  
Patron, Neonatal Transport Forum of Sri Lanka*

Dr Amit Gupta did his postgraduate training in India before moving to the UK in 1999. Following the completion of his general paediatric training, he completed his national neonatal grid training at Oxford and University College Hospital, London. He was appointed as a British Lung Foundation Research Fellow at UCL in 2007, where he spent two years researching the effects of preterm birth on lung growth and development. He was appointed as Consultant in Neonatal Medicine in Oxford in 2009 where he is part of a team of 10 consultants providing tertiary medical and surgical care at the John Radcliffe Hospital, Oxford. He was the Program Director for Paediatric Trainees in Oxford for 3 years and is currently an Associate Dean at the Oxford Deanery.

His areas of interest include newborn ventilation and he is the director for the Oxford Advanced Ventilation Workshop having led several workshops in India and Sri Lanka. He is a co – lead for the national NEC surveillance project in the UK. He led a team of UK specialists to help set up the Sri Lankan Neonatal Transport Project from 2012 onwards and is currently the Patron of the Neonatal Transport Forum of Sri Lanka. This project has led to the establishment of a formal system of neonatal transport in Sri Lanka and included teaching and training of over 200 nurses and doctors in this area. As an Associate Dean, his interests include the exploration of the impact that culture has on performance and is working in partnership with the Royal Colleges to develop awareness around this issue.
